

**Follow-up Q&A from the
GE Aerospace
2026 Annual Shareholders Meeting**

The questions listed below were submitted by shareholders of GE Aerospace (General Electric Company or the Company) during the annual meeting held on May 5, 2026. We are providing answers to these questions to address topics that were not covered during the meeting, in accordance with the meeting’s Rules of Conduct and Procedures ([Rules of Conduct](#)). Questions below are presented as submitted by shareholders, except for revisions to remove content for clarity, concision or in accordance with the Rules of Conduct and Procedures. Questions covering the same topic as a question addressed during the meeting or in the table below are not included.

No.	Questions from shareholders	Answers
1.	Can you summarize the aerospace industry for a person with not a lot of experience in the industry? Where do you see the aerospace industry heading?	Please refer to the About Us section of our website for a history and overview of the aerospace industry and our Company, and to the Technology Innovation section for information on aerospace industry innovation and the Future of Flight.
2.	Have startup companies in the aerospace industry increased competition for the company?	Please refer to the Competition section of our most recent Annual Report for a discussion of the current competitive environment in which the Company operates. In addition, GE Aerospace has partnered with innovators in the aerospace industry, including our partnership with Kratos , our partnership with BETA and our partnership with Merlin , and has celebrated recent successes following our acquisition of Innoveering in 2022.
3.	Please discuss the plans for research and development at GE Aerospace.	In addition to comments made at the annual meeting, we recently discussed our research and development efforts at our Investor Update in July 2025 (which can be found on our Investor Relations website). In October 2025, we presented our Product and Technology Update , held at our GE Aerospace Research Center, which recently celebrated its 75th anniversary . For more information on our research and development efforts generally, please refer to the Research section of our website.
