

California AB 1305 Disclosure Statement

This statement is meant to provide guidance on where disclosures required by California's Voluntary Carbon Market Disclosures Act (AB 1305) can be found throughout GE Aerospace's <u>Sustainability</u> <u>Report</u> and related <u>Supplementary Materials</u>. The information in this AB 1305 Disclosure Statement is not intended to fulfill the Company's disclosure obligations under AB 1305 by itself; such disclosures are located throughout the Sustainability Report and Supplementary Materials, as noted herein.

Overview

The following is a summary of relevant climate-related statements made by the Company throughout the Sustainability Report and Supplementary Materials. We refer you to those documents where these statements are described in full (including, where appropriate, interim steps related to those statements):

Our goal is to achieve net zero carbon for Scope 1 and 2 operational emissions by 2030.¹ Progress toward this goal can be found in our <u>Sustainability Report</u> (pages 32-35) and information on methodologies in the Sustainability Report's <u>Supplementary Materials</u> (pages 29-32). We also have an ambition to achieve net zero by 2050 for Scope 3 carbon emissions from the use of sold products for commercial engines. This supports the goal set by the Air Transport Action Group (ATAG) for net zero carbon emissions by 2050.² Additional details can be found in our <u>Sustainability Report</u> (page 21).

Third-party Verification

GE Aerospace greenhouse gas data for Scope 1, 2, and 3 emissions has been verified by an independent third-party company. Additional details can be found in our <u>Supplementary Materials</u> (pages 34-37).

Voluntary Carbon Offsets (VCOs) Purchases

In 2024, we purchased the following VCOs sold in California:

| | Concepcion 1 | Avonmouth Carbon Mineralization |
|--------------------------------------|--|---|
| Marketplace Name | Patch Technologies, Inc. | Patch Technologies, Inc. |
| Credit Seller Name | Puro.earth | Puro.earth |
| Tonnage Quantity | 2,500 Tonnes | 2,500 Tonnes |
| Standard | puro_earth | puro_earth |
| Project ID | 100289 | 643002406801000671 |
| Project Name | Concepion 1 | Avonmouth Production Facility |
| Project Tech Type | Biochar | Carbonated Materials |
| Project Mechanism | Removal | Removal |
| Location | Bolivia | United Kingdom |
| Project Methodology | Puro Biochar Methodology, Version 3 | Puro.earth Carbonated Materials Methodology, Version 1.0 |
| Validation/Verification Body Name | EnergyLink Services Pty Ltd | Ruby Canyon Environmental, Inc |

1 Locations within GE Aerospace's operational control as defined by the <u>GHG Protocol</u>. 2 <u>https://www.iata.org/en/programs/sustainability/flynetzero/</u>
