This section contains important information about our forward-looking statements. Please also see our annual reports on Form 10-K and quarterly reports on Form 10-Q that we file with the SEC and that you can find on our website by clicking here.

(for communications dated on or after October 20 2026)

CAUTION CONCERNING FORWARD-LOOKING STATEMENTS.

Our public communications and filings we make with the U.S. Securities and Exchange Commission (SEC) may contain statements related to future, not past, events. These forward-looking statements often address our expected future business and financial performance and financial condition, and often contain words such as "expect," "anticipate," "intend," "plan," "believe," "seek," "see," "will," "would," "estimate," "forecast," "target," "preliminary," "range" or similar expressions. Forward-looking statements by their nature address matters that are, to different degrees, uncertain, such as statements about the impacts of macroeconomic and market conditions and volatility on our business operations, financial results and financial position; conditions affecting the aerospace industry, including our customers and suppliers; our expected financial performance, including cash flows, revenue, margins, net income and earnings per share; planned and potential transactions; our credit ratings and outlooks; our funding and liquidity; our cost structures and plans to reduce costs; restructuring, impairment or other financial charges; or tax rates.

For us, particular areas where risks or uncertainties could cause our actual results to be materially different than those expressed in our forward-looking statements include:

- changes in macroeconomic and market conditions and market volatility (including risks related to recession, inflation, supply chain constraints or disruptions, interest rates, values of financial assets, oil, jet fuel and other commodity prices and exchange rates), and the impact of such changes and volatility on our business operations and financial results;
- market or other developments that may affect demand or the financial strength and performance of airframers, airlines, suppliers and other key aerospace industry participants, such as demand for air travel, supply chain or other production constraints, shifts in U.S. or foreign government defense programs and other industry dynamics;
- pricing, cost, volume and the timing of sales, deliveries, investment and production by us and our customers, suppliers or other industry participants;
- the impact of actual or potential safety or quality issues or failures of our products or third-party products with which our products are integrated, including design, production, performance, durability or other issues, and related costs and reputational effects;
- operational execution on our business plans, including our performance amidst market growth and ramping newer product platforms, meeting delivery and other contractual obligations, improving turnaround times in our services businesses and reducing costs over time;
- global economic trends, competition and geopolitical risks, including evolving impacts from tariffs, sanctions or other trade tensions between the U.S. and other countries, or demand or supply shocks from events such as a major terrorist attack, war (including

conflict in the Middle East), natural disasters or actual or threatened public health pandemics or other emergencies;
- the amount and timing of our income and cash flows, which may be impacted by macroeconomic, customer, supplier, competitive, contractual, financial or accounting (including changes in estimates) and other dynamics and conditions;
- our capital allocation plans, including the timing and amount of dividends, share repurchases, acquisitions, organic investments and other priorities;
- our decisions about investments in research and development or new products, services and platforms, and our ability to launch new products in a cost-effective manner, as well as technology developments and other dynamics that could shift the demand or competitive landscape for our products and services;
- our success in executing planned and potential transactions, including the timing for such transactions, the ability to satisfy regulatory requirements or any applicable pre-conditions and the expected benefits;
- downgrades of our credit ratings or ratings outlooks, or changes in rating application or methodology, and the related impact on our funding profile, costs, liquidity and competitive position;
- capital or liquidity needs associated with our run-off insurance operations or mortgage portfolio in Poland (Bank BPH), the amount and timing of any required future capital contributions and any strategic options that we may consider;
- changes in law, regulation or policy that may affect our business, including policies related to trade, tariffs or capital allocation; government defense priorities or budgets; environmental or climate regulation, incentives and emissions offsetting or trading regimes and the effects of tax law changes or audits;
- the impact of regulation; government investigations; regulatory, commercial and legal proceedings or disputes; environmental, health and safety matters; or other legal compliance risks, including the impact of shareholder and related lawsuits, Bank BPH and other proceedings that are described in our SEC filings;
- the impact related to information technology, cybersecurity, artificial intelligence or data security developments or breaches at GE Aerospace or third parties; and
- the other factors that are described in the "Risk Factors" section in our Annual Report on Form 10-K for the year ended December 31, 2025, as such descriptions may be updated or amended in future reports we file with the SEC.

These or other uncertainties may cause our actual future results to be materially different than those expressed in our forward-looking statements. We do not undertake to update our forward-looking statements. Our public communications and SEC filings may include certain forward-looking projected financial information that is based on current estimates and forecasts. Actual results could differ materially.

GE Aerospace's Investor Relations website at www.geaerospace.com/investor-relations, as well as GE Aerospace's LinkedIn and other social media accounts, contain a significant amount of information about GE Aerospace, including financial and other information for investors. GE Aerospace encourages investors to visit these websites from time to time, as information is updated and new information is posted.
